Microbiome research in cancer prevention

February 11, 2020, 3 – 4 p.m. EST

Research into the microbiome has the potential to expand our understanding of the link between diet, lifestyle and chronic disease. In this webinar, we will explore sample collection, data analysis, and the rationale for studying the microbiome and cancer risk and discuss recent findings in this area. All are welcome!

Relationship of diet and lifestyle factors to the human microbiome
Johanna Lampe, PhD, RD
Associate Director, Public Health Sciences Division, Fred Hutch
Research Professor, Epidemiology, University of Washington

The microbiome and cancer risk: recent findings
Jiyoung Ahn, PhD
Associate Professor, NYU School of Medicine
Associate Director of Population Science, NYU Perlmutter Cancer Center

Collection and analysis of microbiome samples
Emily Vogtmann, PhD, MPH
Earl Stadtman Investigator, Metabolic Epidemiology Branch, Division of Cancer Epi & Genetics, National Cancer Institute
